

## CHAPTER 15

### SIGNS

#### SECTION 15.01 PURPOSE AND INTENT

It is hereby determined that regulation of the location, size, placement and certain features of signs is necessary to enable the public to locate goods, services and facilities without difficulty and confusion, to promote traffic safety, safeguard public health and welfare, and facilitate police and fire protection. In addition, it is the intent of this Ordinance to assure the continued attractiveness of the total community environment through the adoption of discretionary controls designed to preserve scenic, aesthetic and economic values within the Township.

These regulations are designed to permit maximum legibility and effectiveness of signs and to prevent their over-concentration, improper placement and excessive height, bulk and area. In general, it is intended that signs of a general commercial or industrial nature be prohibited in districts where commercial or industrial activities are prohibited and that signs in residential districts be limited to those directly related to activities on the premises.

#### SECTION 15.02 COMPUTATION OF SIGN AREA

For the purposes of this Ordinance, the total area of a sign shall be expressed in square feet and shall be computed as follows:

- A. **Single-Face Sign.** The total area of a single-face sign shall be computed as the number of square feet within any single or combination of geometric shapes -- such as a square, rectangle, triangle or circle -- encompassing the extreme limits of an individual letter(s), word(s), message(s), representation, emblem or any similar figure, including open space(s), together with any frame or other material forming an integral part of display used to differentiate such sign from the background against which it is placed.
- B. **Double-Face Signs:** For double-face signs having two (2) faces of equal size arranged and/or positioned back to back, parallel to each other, with no more than a two (2) foot space between the two faces; the area of the sign shall be computed as one-half ( $\frac{1}{2}$ ) the total area of the two (2) faces. When the faces of such a sign are not of equal area, then the area of the sign shall be computed as the total area of the largest face.
- C. **Three-Dimensional Signs.** For signs which are designed as a three dimensioned geometric form such as a sphere, cone, cylinder, or cube; the area shall be computed as one half ( $\frac{1}{2}$ ) the total surface of the geometric form.

**SECTION 15.03 PERMIT REQUIRED FOR SIGNS**

- A. **Sign Erection Permit:** It shall be unlawful for any person to construct, erect, re-erect, move, alter, enlarge, or illuminate, any sign unless a permit shall have been first obtained from the Zoning Administrator, except as provided in Section 15.05 (Signs Exempt from Permit Requirement). Any sign that makes use of electricity, shall, in addition to a sign permit, require an electrical permit, regardless of size.
- B. **Sign Maintenance or Change of Message:** No permit shall be required for ordinary servicing, repainting of existing sign message, or cleaning of a sign. No permit is required for change of message of a sign designed for periodic message change without change of structure, including a bulletin board or billboard, but not including a sign to which a new permanent face may be attached.
- C. **Planning Commission Approval:** All subdivision/development signs, time/date/or temperature signs, off-premises signs, or any type of sign not explicitly defined herein, must be approved by the Decatur Township Planning Commission before a permit shall be issued.

requires, the specifications shall include the certificate or seal of a registered structural or civil engineer as a condition to the issuance of a permit.

7. Name and address of the sign erector.
  8. Such other information as the Zoning Administrator may require to show full compliance with this and all other applicable laws of the Township and the State of Michigan.
- E. **Sign Erection Permit Expiration.** A sign permit shall become null and void if the work for which the permit was issued is not completed within 90 days of the date of issue.
- F. **Compliance Certification:** All signs shall be inspected at original installation and if found to be in full compliance with the provisions of this Chapter, shall be issued a Zoning Permit Certificate.
